Carbon Reduction Plan

Supplier name: EMS Physio Ltd

Publication date: 23/01/2024

Commitment to achieving Net Zero

EMS Physio Ltd is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
EMS Physio Ltd has not previously assessed or reported emissions and have new baseline for 2023, see below	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	15.9
Scope 2	10.9
Scope 3 (Included Sources)	71.3 Purchased goods and services. Fuel and energy related activities Upstream transportation and distribution Waste generation in operations Business travel Employee commuting Downstream transport and distribution

Total Emissions	98.1
------------------------	------

Current Emissions Reporting

Reporting Year: N/A	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	15.9
Scope 2	10.9
Scope 3 (Included Sources)	71.3
Total Emissions	98.1

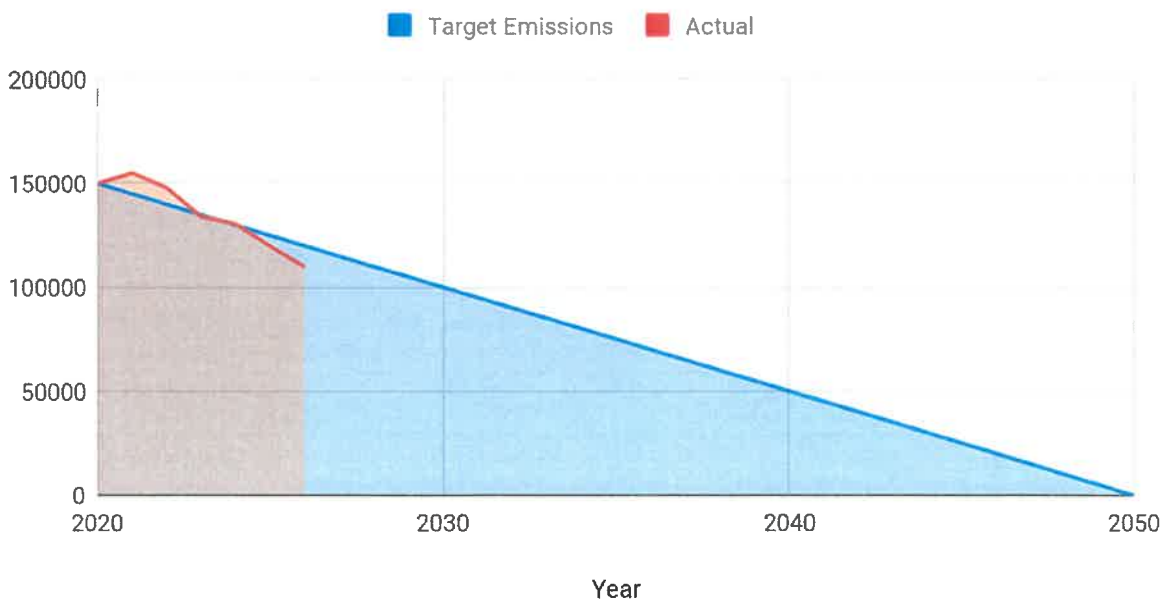

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. Please note, this is the first year of reporting.

We project that carbon emissions will decrease over the next five years to 82 tCO₂e by 2029. This is a reduction of 16.1%.

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to XX tCO₂e, a XX%ge reduction against the 20XX baseline and the measures will be in effect when performing the contract

Baseline data recently collected, 1st year of reporting.

EMS Physio Ltd have an Environmental Group that has convened to help our team make the necessary changes to processes to save paper, use less energy and reduce waste. We have also implemented PIR lighting at our factory, have offered The Bike to Work Scheme to our employees and encourage local staff to walk to work.

In the future we hope to implement further measures such as:

Electric car charging points, solar panels (if practicable) and encourage more working from home for appropriate staff members.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

James Greenham
